

IN-PERSON EVENT

Final event

November 29 & 30, 2023

Police Complex of Canillas, Madrid. Spain.

About the event

GRACE - Global Response Against Child Exploitation

The core ambition of GRACE project (Global Response Against Child Exploitation) is to perform research and innovation in the child sexual exploitation area by applying artificial intelligence capabilities under a European-wide platform to automate and improve the processing of Child Sexual Exploitation Material (CSEM) referrals.

After more than three years of internal development, the GRACE project is thrilled to share the promising results of our research in our final project event taking place on Wednesday 29th and Thursday 30th November 2023.

Wednesday 29th November:

- A hands-on **Demonstration Workshop** to showcase the full capabilities of the GRACE Collaborative Platform.
- This session is **exclusively** dedicated to EU Member States (MS) and international Law Enforcement Agencies (LEAs) who will be able to view the GRACE platform in action using live tests using operational data.

Thursday 30th November:

- A closing event for the GRACE project where everyone is welcome!
- This event will include a **Keynote speaker**, an **overview of GRACE** and the **project's results**, presentations from **H2020 sister projects**, the **GRACE toolfest** and the opportunity to **network with colleagues** within the field of CSEM.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 883341.
